

*Erasmus call KA131 2022 for mobility towards Programme Countries
Annex 2 – University of Pisa selection single criteria for scoring procedure.*

Bachelor's, Master's and Single Cycle degrees

Mobilità for study

AC = (Anno Corrente) Current Year. The year of call publication

AI = (Anno Iscrizione) Enrollment Year. The year of first enrollment in the study programme the student is attending. If the student enrolled in academic year X / Y, the enrollment year should always be considered the year X, regardless of the actual enrollment completion.

NA = (Numero crediti attesi) Number of expected credits. The estimate credits the student should have acquired when applying for the call.

NA is the result of the following formula:

$$NA = \begin{cases} (AC - AI) * 60 - 30 & \text{call first opening} \\ (AC - AI) * 60 & \text{call possible reopening} \end{cases}$$

If $NA \leq 0$, NA is initialized to the value of 30.

In the call first opening, 30 is subtracted because students may have acquired credits only for the first semester of the year. **In the event of being or having been a part-time student, the years when the student has been in this status are counted as 30 instead of 60.**

NS = (Numero di crediti acquisiti dallo studente, alla data di scadenza del bando, a partire dal primo ottobre dell'anno di iscrizione al corso di studio per cui lo studente partecipa al bando. Sono esclusi dal calcolo di NS gli esami riconosciuti o convalidati). Number of credits acquired by the student, by the Call's deadline, starting from 1 October of the enrolment year in the degree programme which the student applies for in the call. Recognised or validated exams are excluded from the NS calculation.

RS = (Rendimento dello studente) Student performance. Credits percentage acquired by the student with respect to the expected credits

$$RS = \frac{NS}{NA}$$

MP = (Media Pesata) Weighted average grade. Weighted average grade of the exams taken in the programme the student is enrolled in. For the weighted average grade calculation, 30 cum laude is considered differently (from 31 to 33) depending on the study programme. This value is taken from

esse3 system, where it is calculated for each study course considering the value assigned to honors by the relevant study programme.

PL = (Punteggio assegnato alla lode) Score awarded to honors. It depends on the single study programme.

PS = (Punteggio studente) Student score.

$$PS = \frac{MP - 18}{PL - 18} \cdot 50 + RS \cdot 50$$

With regard to language certification, the CAI (Area Coordinator for Internationalization) can assess whether the language knowledge level declared by the student is not adequate for a specific institution and cancel that institution from the three possible options selected by the student.

In addition, the CAI assesses the relevance of the training proposal submitted by the student for a specific institution with the student's curriculum and may decide not to assign the institution if this relevance is not considered adequate.

Mobility for traineeship

Two ranking lists are made using the previously calculated PS, one for pre-graduate mobility and one for post-graduate mobility. **Priority is given to pre-graduate mobility.**

PhD, Postgraduate Programme, Specialization

PT = (Punteggio ottenuto dallo studente nel conseguire il titolo utilizzato per l'accesso al Corso di studio in cui lo studente è iscritto) The grade obtained by the student for the qualification used to access the degree programme the student is enrolled in (typically the final grade; if not reported, the weighted average grade of the exams is used).

PM = (Valore massimo di PT) Maximum value of PT (for Italian degree 110 and honors; a value of 2 is attributed to the honors, thus resulting in the maximum value equal to 112).

PS = (Punteggio studente) Student score

$$PS = \frac{PT}{PM} \cdot 100$$

The maximum value of PS is therefore 100.

The ranking list referring to PhD, Postgraduate Programme and Specialization students is drawn up separately from the ranking list of the students previously considered and has lower priority.

N.B. Values must be rounded to the second decimal place.

ADDITIONAL PRIORITY CRITERIA

Candidates having already been in mobility actions (within the Lifelong Learning Programme, Erasmus +, Erasmus Mundus, for the same study cycle of application, including mobility carried out in the context of Erasmus + Consortia, such as for example Consortium traineeship, Consorzio ILO and Consortium ILO-2, Consortium SEND, etc...) **will be placed at the end of the ranking list, according to score order.**

Similarly, candidates applying for multiple mobilities, **for the second mobility**, will be placed at the end of the ranking list, according to score order.

In the event of equal score, priority is given to regular students over those “Fuori Corso”. In case of PhD and Specialization programme, priority is given to students having enrolled for more years. In the event of further equality, the youngest candidate will prevail.

GESTIONE DELLE GRADUATORIE

Ranking lists management

Once the CAI has drawn up the ranking list, the available institution is assigned among the three selected by the student, starting from the students with highest placement in the ranking list, in compliance with the priority selected by the student. In the event of multiple mobilities, the first available institution will be assigned and the student will be placed at the end of the ranking list for the second institution assignment.

If seat assignment to any student on the ranking list is not possible because the places available for the three options have been already assigned and / or because the application deadlines have expired in the selected institution, the CAI may decide, after having consulted with the student, to assign one of the remaining available institutions.

The student will be contacted only by institutional e-mail account licensed by the University of Pisa

Students can be summoned by their own CAI to join meetings for the seat assignment.

At the end of the selection procedures, the merit- based ranking lists selected by Area / Department are published by each CAI on the University Official Journal at:
<https://alboufficiale.unipi.it>.
