AUTHENTICATION OF ALICE CREDENTIALS

After registering on Alice, the next step is the authentication of your Alice credentials.

Please always wait a day before doing this passage of the procedure, as the system need some time to store the data and could give an error if done too soon.

To authenticate your credentials, go to the following page: https://identity.unipi.it/App/Pwd/ResetPwd

On the right, enter your **tax code** (it will be auto-generated by Alice, you will be able to find it on your Alice profile) and your e-mail address (the one you used when creating your ALICE credentials).
Then, solve the captcha and click on "*Invia*".

You will receive an e-mail to change your password. You will need the new password to log into the Erasmus Portal.

- Be cautious not to type blank spaces when doing the authentication and when logging into the Erasmus Portal.
- Do not use accented letters when creating your new password.
